AI TRANSPARENCY, SAFETY & RESPONSIBLE AI STATEMENT
HEY ATTRANGI
(A Digital Mental Health Platform operated by Aatrangi Private Limited)

1. INTRODUCTION
Welcome to Hey Attrangi. This AI Transparency, Safety & Responsible AI Statement explains how we design, deploy, monitor, evaluate, and govern Artificial Intelligence systems across our Platform.

We are committed to responsible, ethical, and transparent AI deployment in digital mental healthcare. This Statement demonstrates our commitment to ensuring that AI serves humanity, benefits people's lives, and addresses potential harms while fostering responsible innovation.

This Statement is designed to comply with applicable laws of the Republic of India, including the Digital Personal Data Protection Act, 2023, and the Information Technology Act, 2000. It is also informed by internationally recognized principles, including the World Health Organization's guidance on the ethics and governance of artificial intelligence for health.

2. WHAT AI IS USED FOR
AI assists with:

Conversational support

Mood analysis

Wellness recommendations

Personalization

Crisis detection

Clinical documentation support

Therapist workflow assistance

Voice input processing (converting speech to text for AI interaction)

AI is a supportive tool designed to complement, not replace, professional mental healthcare.

3. WHAT AI CANNOT DO
The AI System:

Is not a psychologist, psychiatrist, therapist, physician, or healthcare practitioner

Does not independently diagnose any medical or psychological condition

Does not prescribe medications or recommend specific pharmaceutical treatments

Does not replace licensed mental healthcare professionals, clinical judgment, or therapeutic intervention

Does not make clinical decisions, which remain solely with Licensed Therapists and other qualified mental health professionals

Is a supportive tool designed to complement, not replace, professional mental healthcare

Should not be relied upon as the sole source of mental health support, clinical guidance, or emergency response

Cannot guarantee accuracy, completeness, timeliness, or appropriateness of outputs

Cannot guarantee any specific therapeutic outcome or result

Does not generate spoken responses (AI always responds in text only)

Does not perform speaker identification, voice authentication, voice biometrics, voice profiling, voice cloning, or voiceprint creation

We do not represent or warrant that the AI System will meet your specific needs or achieve any particular outcome.

4. THE ROLE OF THERAPISTS
Licensed Therapists remain solely responsible for all clinical decisions. Therapists retain authority to review, override, modify, or disregard AI-generated recommendations whenever clinically appropriate.

AI outputs are advisory and supplementary. Final clinical decisions remain with Licensed Therapists and other qualified mental health professionals.

5. YOUR RIGHTS
You have the right to:

Understand how AI is used

Request plain-language explanations of AI-generated outputs where reasonably possible

Manage AI memory

Withdraw consent for AI services in accordance with our AI Assistance Consent form

Understand how voice input is processed and choose whether to use it

6. OUR RESPONSIBLE AI PRINCIPLES
We adopt the following Responsible AI Principles, which guide the design, deployment, monitoring, evaluation, and governance of all AI systems across our Platform.

Principle 1 — Human Oversight
Purpose: To ensure that AI systems augment, rather than replace, human judgment and clinical decision-making.

What This Means for You:

No AI System shall make autonomous clinical decisions without human review and approval where clinical judgment is required

AI outputs shall be clearly identified as AI-generated and shall not be presented as human clinical judgment

All AI outputs shall be subject to appropriate human review where clinically indicated

Licensed Therapists and authorized personnel retain the authority to review, override, modify, or disregard AI-generated recommendations whenever clinically appropriate

Principle 2 — Safety First
Purpose: To ensure that AI systems are designed to minimize the risk of harm to Users.

What This Means for You:

AI systems are designed to detect and respond to potential safety concerns

Safety thresholds and parameters are subject to ongoing review and refinement

Incident response procedures are maintained for AI-related safety incidents

The principle of "Do No Harm" guides all AI development and deployment decisions

Principle 3 — Privacy by Design
Purpose: To ensure that privacy protections are embedded into AI systems from the outset.

What This Means for You:

AI systems collect and process only such data as is reasonably necessary for specified purposes

Appropriate safeguards are applied to data used for AI improvement

Your consent is obtained for AI services in accordance with our AI Assistance Consent form

Children's data is subject to enhanced protections in accordance with our Children's Privacy & Protection Policy

Principle 4 — Clinical Responsibility
Purpose: To ensure that clinical decisions remain with qualified mental health professionals, and that AI supports, rather than supplants, clinical judgment.

What This Means for You:

AI systems shall not independently diagnose medical or psychiatric conditions

AI systems shall not prescribe medications

AI outputs shall not replace the clinical judgment of Licensed Therapists

Clinical documentation shall clearly distinguish between AI-generated content and therapist-generated content

Principle 5 — Transparency
Purpose: To ensure that you understand how AI is used, what it can and cannot do, and how your data is processed.

What This Means for You:

You will be clearly informed when you are interacting with AI rather than a human

AI systems shall not present themselves as licensed clinicians

You have access to plain-language explanations of AI-generated outputs where reasonably possible

This Statement and our AI Assistance Consent form are publicly available and regularly updated

Principle 6 — Explainability
Purpose: To ensure that AI systems are interpretable to the extent feasible.

What This Means for You:

You have the right to request explanations of AI outputs

Explanations shall be provided in plain, understandable language

We make reasonable efforts to provide meaningful explanations without disclosing proprietary information

Internal documentation maintains records of AI system design and decision-making processes

Principle 7 — Accountability
Purpose: To ensure clear attribution of accountability for AI developers and deployers.

What This Means for You:

Clear roles and responsibilities are assigned for AI governance

Incident response and escalation procedures are maintained

Regular audits and reviews are conducted

Continuous improvement mechanisms are implemented

Principle 8 — Fairness
Purpose: To ensure that AI systems are designed and tested in a way that outcomes are fair, non-exclusionary, unbiased, and do not discriminate.

What This Means for You:

AI systems are tested for potential biases

Fairness is evaluated across diverse User populations

Mitigation measures are implemented where biases are identified

Continuous monitoring is conducted to ensure ongoing fairness

Principle 9 — Security
Purpose: To ensure that AI systems are secure and resilient against threats.

What This Means for You:

AI systems are protected from unauthorized access and manipulation

Security incidents are promptly investigated and remediated

Regular security reviews and assessments are conducted

Security by design principles are applied to AI system development

Principle 10 — Reliability
Purpose: To ensure that AI systems perform reliably and consistently.

What This Means for You:

AI system performance is continuously monitored

Quality assurance reviews are conducted regularly

Issues and errors are promptly identified and addressed

Reliability metrics are tracked and reported

Principle 11 — User Control
Purpose: To ensure that you have control over your interactions with AI systems.

What This Means for You:

You have the right to request deletion of AI memory

You have the right to withdraw consent for AI services

You have the right to request explanations of AI outputs

You have the right to choose between typed text and voice input

You may grant or withdraw microphone permission at any time through your device settings

Principle 12 — Child Safety
Purpose: To ensure that AI systems provide safe and appropriate interactions for Minor Users.

What This Means for You:

AI systems adapt responses according to the Child's age and developmental stage

AI systems use child-friendly language

AI systems automatically restrict unsafe, illegal, explicit, exploitative, or age-inappropriate interactions

Safety concerns are escalated in accordance with applicable policies

Principle 13 — Accessibility
Purpose: To ensure that AI systems are accessible to Users with diverse needs and abilities.

What This Means for You:

AI systems are designed with accessibility in mind

User feedback is incorporated to improve accessibility

Continuous improvement of accessibility is pursued

Principle 14 — Continuous Improvement
Purpose: To ensure that AI systems are continuously improved through monitoring, evaluation, user feedback, and research.

What This Means for You:

AI systems are continuously monitored and evaluated

User feedback is incorporated into improvement processes

Research and academic collaborations inform improvement

Model training and refinement are conducted with appropriate safeguards

7. AI SYSTEMS ON OUR PLATFORM
Our Platform may utilize one or more of the following types of AI models and technologies:

Proprietary AI Models: AI models developed internally

Open-Source AI Models: AI models distributed under open-source licenses

Third-Party Commercial AI Models: AI models provided by trusted third-party service providers operating under appropriate contractual, privacy, confidentiality, and security obligations

The specific AI technologies utilized may evolve over time. All AI models deployed on our Platform are subject to the Responsible AI Principles set forth in this Statement, regardless of their origin.

Our Platform may utilize multimodal AI (processing multiple types of data inputs) and future AI technologies as they are introduced, subject to this Statement.

8. AI CAPABILITIES

The AI System provides the following capabilities, which may evolve over time:

Conversational AI: Engaging in text-based conversations to provide emotional wellbeing support, active listening, and guided reflection. You may interact with the AI either by typing text or by using voice input, as described in this Statement.

Voice Input Processing: Converting spoken input into text for AI interaction. Raw audio is not retained after successful transcription. Only the generated transcript becomes part of your conversation history.

Mood Analysis: Analyzing mood based on inputs, assessments, and interaction patterns to provide insights and recommendations

Emotional Support: Providing supportive and non-judgmental responses to concerns

Personalization: Tailoring responses, recommendations, and content to preferences and needs

Conversation Memory: Retaining information from previous conversations to provide continuity of support

Wellness Recommendations: Providing personalized recommendations for wellness activities, coping strategies, and self-care practices

Assessment Support: Administering standardized and non-standardized screening tools to assess aspects of mental health

Medication Reminders: Providing notifications to support adherence to prescribed medication regimens

Journal Insights: Offering prompts, guidance, and reflective questions to support journaling practice

Risk Identification: Identifying potential clinical risks based on inputs and interaction patterns

Crisis Detection: Identifying potential indicators of crisis situations

Clinical Documentation Support: Assisting with the preparation of clinical documentation

Therapist Workflow Assistance: Supporting Licensed Therapists with documentation and workflow management

Follow-up Recommendations: Generating recommendations for follow-up care

Multilingual Support: Supporting conversations in multiple languages

Future Multimodal Capabilities: Any additional capabilities that may be introduced in the future

9. VOICE INPUT PROCESSING

The Platform offers you the option to provide input to the AI Companion through voice, in addition to typed text. This section explains how voice input works and how your voice data is processed.

9.1 Optional Nature

Voice input is entirely optional. You may continue to interact with the AI Companion exclusively through typed text if you so choose. Typing remains fully supported at all times.

9.2 How Voice Input Works

When you choose to use voice input:

Microphone Permission: The application requests permission to access your device's microphone only when you choose to use voice input. You may grant or withdraw this permission at any time through your device settings.

Speech-to-Text Conversion: Your speech is converted into text using a trusted third-party speech recognition service operating under appropriate contractual confidentiality, privacy, and security obligations.

Text-Only Responses: The AI always responds in text. The AI does not generate spoken responses.

Transcript Processing: The generated transcript is processed by the AI Companion in the same manner as a typed message and becomes part of your conversation history.

9.3 Data Retention and Privacy

Raw Audio Discarded: Raw audio recordings are not retained after successful transcription. Immediately after your speech has been converted into text, the raw audio is securely discarded.

Transcript Retention: Only the generated transcript is retained as part of your conversation history and is subject to the same privacy policies, retention policies, and AI safeguards as typed messages.

No Voice Identification: The AI does not use your voice to identify you. The platform does not perform speaker identification, voice authentication, voice biometrics, voice profiling, voice cloning, or voiceprint creation.

No Voice Storage: Your voice is not used to create a voiceprint or biometric profile.

9.4 Speech Recognition Limitations
Speech recognition technology may occasionally generate inaccurate words, punctuation, names, accents, or interpretations. Factors that may affect accuracy include:

Background noise

Accents and dialects

Speech clarity and speed

Technical limitations of the speech recognition service

You remain responsible for reviewing important information before relying upon AI responses. We recommend reviewing critical information that may affect your health, safety, or wellbeing.

9.5 Voice Interactions and AI Safeguards
Voice conversations are subject to the same AI limitations, safety mechanisms, content moderation, crisis detection, and disclaimers that apply to typed conversations. The AI System's safety measures operate regardless of how you provide input.

9.6 User Control
You may grant or withdraw microphone permission at any time through your device's operating system settings

If microphone permission is denied, voice input becomes unavailable while text input continues to function normally

Your decision to use or not use voice input does not affect your access to any other Platform features

10. EXPLAINABILITY
You may request plain-language explanations, where reasonably possible, regarding AI-generated recommendations or outputs.

Requests for explanations shall be processed in a timely manner and shall be provided in plain, understandable language.

We make reasonable efforts to provide meaningful explanations without disclosing proprietary information.

The following information is not publicly disclosed:

Proprietary algorithms and model architecture

Internal safety thresholds and confidence scores

Confidential implementation details

Trade secrets and other proprietary information

We maintain internal documentation of AI system design, decision-making processes, and safety mechanisms to support explainability and accountability.

11. AI SAFETY

We implement comprehensive safety mechanisms to protect Users and ensure responsible AI operation.

Internal Confidence Mechanisms

The AI System employs internally defined confidence scores and safety thresholds to evaluate the reliability of its outputs and identify potential safety concerns.

Safety Systems

Safety systems include content moderation, risk detection, crisis detection, and clinical escalation procedures.

Risk Detection

The AI System is designed to identify potential indicators of risk, including but not limited to suicide risk, self-harm, violence, abuse, neglect, severe psychosis, and medical emergencies.

Content Moderation

Automated and human content moderation is implemented to prevent exposure to inappropriate, harmful, or age-inappropriate content.

Human Oversight

Human oversight is maintained for AI outputs, particularly in safety-critical contexts.

Clinical Escalation

Procedures are maintained for escalating safety concerns to Licensed Therapists, clinical supervisors, crisis response staff, and, where appropriate, emergency services.

Safety Monitoring

Continuous monitoring of AI system safety performance is conducted.

Child Protections
Enhanced safety protections are implemented for Minor Users in accordance with our Children's Privacy & Protection Policy.

Crisis Handling
The AI System includes crisis detection and escalation capabilities, as governed by our Crisis Intervention Consent form.

Confidentiality of Safety Parameters
Internal confidence scores, thresholds, and safety parameters are proprietary and confidential. These are not publicly disclosed to protect the integrity and effectiveness of the safety systems and to prevent attempts to circumvent safety measures.

12. LIMITATIONS
You acknowledge and accept that the AI System has significant limitations, including but not limited to:

Inaccurate Outputs: The AI System may generate responses that are factually incorrect, outdated, or inconsistent with established clinical knowledge

Incomplete Outputs: The AI System may generate responses that are incomplete, superficial, or fail to address the full scope of your concerns

Misunderstanding Context: The AI System may misinterpret your inputs, context, or intent

Misleading Outputs: The AI System may generate outputs that appear authoritative or clinically valid but are, in fact, misleading or inappropriate

Failure to Detect Emergencies: The AI System may fail to detect crisis situations that would be recognizable to a human professional

Hallucination: The AI System may generate content that appears plausible but is entirely fabricated

Generalized Responses: The AI System may provide responses that are overly generalized and fail to address your specific needs

Impact of Incomplete User Input: The AI System's responses are dependent on the completeness and accuracy of your inputs

Lack of Emotional Intelligence: The AI System lacks genuine emotional intelligence, empathy, and the capacity for human connection that is fundamental to effective therapeutic relationships

Speech Recognition Errors: Speech recognition technology may occasionally misinterpret words, context, or meaning, leading to inaccurate transcripts and potentially inappropriate AI responses

You should verify important decisions with qualified professionals where appropriate. We do not warrant or guarantee the accuracy, completeness, timeliness, or appropriateness of any AI-generated content.

13. AI MEMORY
The AI System maintains memory of previous conversations and interactions to provide continuity of care and personalized experiences.

AI Memory May Include:
Previous discussions and conversational exchanges

Previous emotional concerns and themes

User preferences, including communication style and content preferences

Wellness goals and objectives

Previous recommendations

Mood trends and patterns

Behavioural patterns

Managing AI Memory
You may request deletion or modification of portions of AI memory where operationally feasible and subject to applicable legal, clinical, and governance obligations

Therapists and authorized Caregivers (where applicable) may manage relevant AI memory where clinically appropriate

Deletion requests shall be processed in accordance with our Privacy Policy, Data Retention & Deletion Policy, and applicable law

For more information on AI memory, please refer to our AI Assistance Consent form.

14. MODEL TRAINING
The AI System does not automatically learn from each individual conversation in real time.

Model improvements occur through controlled training, evaluation, validation, governance, and quality assurance processes.

Safeguards Applied to Model Training:
De-identification: Removing or modifying personal identifiers from data used for training

Anonymization: Rendering data irreversible such that it cannot be linked to an identifiable individual

Aggregation: Combining data from multiple individuals into summary form

Human Review: Human review of training data and processes

Clinical Governance: Clinical oversight of model training and improvement

Quality Assurance: Quality assurance reviews of model performance

Privacy Review: Privacy review of training data and processes

Children's information is subject to enhanced protections in accordance with our Children's Privacy & Protection Policy.

For more information on data processing and AI improvement, please refer to our Data Processing Consent form and Privacy Policy.

15. BIAS, FAIRNESS & QUALITY
We are committed to identifying and mitigating potential biases in AI systems.

Our Commitments:
Bias Testing: Testing AI systems for potential biases across diverse User populations

Fairness Evaluation: Evaluating the fairness of AI outputs and outcomes

Clinical Validation: Validating AI outputs against clinical standards and expectations

Internal Testing: Conducting internal testing of AI system performance

User Feedback: Incorporating User feedback into improvement processes

Academic Collaborations: Collaborating with academic institutions on research and evaluation

Benchmarking: Benchmarking AI system performance against industry standards

Continuous Monitoring: Continuously monitoring AI system performance for potential issues

Performance Evaluation: Regularly evaluating AI system performance against established metrics

Risk Assessment: Conducting risk assessments for AI system deployment

16. HUMAN OVERSIGHT
Therapists and authorized personnel retain authority to review, override, modify, or disregard AI-generated recommendations whenever clinically appropriate.

Human Oversight Throughout the AI Lifecycle:
Design: Human input in AI system design and development

Deployment: Human review of AI system deployment and configuration

Monitoring: Human monitoring of AI system performance

Review: Human review of AI outputs where clinically indicated

Escalation: Human escalation of safety concerns

Improvement: Human input into AI system improvement processes

Governance: Human oversight of AI governance and accountability

Human Oversight Procedures:
Quality assurance reviews

Clinical supervision

Incident response and escalation

Performance monitoring

Continuous improvement

Final clinical decisions remain with Licensed Therapists and other qualified mental health professionals.

17. SERVICE AVAILABILITY
We aim to provide continuous availability of AI services but do not guarantee uninterrupted, error-free, or always-available AI services.

If AI Services Become Temporarily Unavailable:

Some Platform functionality may be reduced

AI-generated recommendations and outputs may not be available

Therapist-led services and other human-supported services may continue where operationally available

You will be notified of significant service disruptions where reasonably practicable

We make reasonable efforts to restore AI services promptly following disruptions.

18. FUTURE AI
We reserve the right to introduce new AI technologies and capabilities, including but not limited to:

New AI Models

Voice AI (the AI may support additional voice-related capabilities in the future)

Vision AI

Multimodal AI

Agentic AI

Personalized AI

Other Emerging AI Technologies

Introduction of New AI Technologies Shall Be Subject To:
This Statement and the Responsible AI Principles set forth herein

Applicable governance processes

Risk assessment and evaluation

Appropriate User notice and consent where required

Applicable legal and regulatory requirements

19. AI GOVERNANCE
We maintain a comprehensive AI governance framework to ensure responsible AI deployment.

Governance Roles and Responsibilities:

AI Governance Office:

Overseeing AI governance and compliance

Maintaining this Statement and associated policies

Conducting AI risk assessments

Monitoring AI system performance and safety

Coordinating AI incident response

Clinical Governance Office:

Overseeing clinical aspects of AI deployment

Ensuring clinical validation and quality assurance

Managing clinical escalation procedures

Overseeing therapist oversight of AI outputs

Privacy & Compliance Office:

Ensuring privacy compliance in AI systems

Overseeing data protection in AI processing

Managing User rights and consent

Ensuring compliance with applicable laws

Engineering Team:

Developing and maintaining AI systems

Implementing technical safeguards

Conducting performance monitoring

Addressing technical issues and incidents

Security Team:

Securing AI systems and data

Investigating security incidents

Conducting security reviews

Implementing security safeguards

Licensed Therapists:

Exercising clinical judgment in AI-supported contexts

Reviewing AI outputs where clinically indicated

Escalating safety concerns

Providing feedback on AI system performance

Legal Department:

Ensuring legal compliance

Managing legal risks

Overseeing regulatory engagement

Executive Leadership:

Providing strategic oversight

Allocating resources for AI governance

Approving AI governance policies

Ensuring accountability

Governance Workflows:
Periodic Review: AI systems and governance frameworks are reviewed periodically to ensure they remain effective and compliant

Risk Assessment: Risk assessments are conducted for new AI deployments and significant changes to existing AI systems

Incident Management: Incident response procedures are maintained for AI-related incidents

Continuous Improvement: Lessons learned from monitoring, incidents, and feedback are incorporated into continuous improvement processes

20. CHANGES TO THIS STATEMENT
We may update this Statement from time to time to reflect changes in practices, legal requirements, or operational needs.

When material changes are made to this Statement, we will notify you through:

The Platform

Email to registered email addresses

In-app notifications

Any other appropriate means

The "Effective Date" at the top of this Statement indicates when it was last revised.

Your continued use of the Platform after the effective date of any changes constitutes your acceptance of the updated Statement, subject to any additional consent requirements under applicable law.

21. CONTACT US
If you have any questions, concerns, or complaints about this Statement or our AI practices, please contact us:

Email: contact@heyattrangi.com

Website: https://www.heyattrangi.com/

Address: Aatrangi Private Limited, Jai Jinendra Banglow, Hubli-Dharwad Road, KHB Colony, Narayanpura, Dharwad, Karnataka - 580009, India

If you are not satisfied with our response, you have the right to file a complaint with the Data Protection Board of India in accordance with the Digital Personal Data Protection Act, 2023.

RELATED DOCUMENTS
This Statement should be read together with:

Our Privacy Policy

Our Terms & Conditions

Our AI Assistance Consent form

Our General Treatment Consent form

Our Teletherapy Consent form

Our Crisis Intervention Consent form

Our Data Processing Consent form

Our Children's Privacy & Protection Policy

Thank you for trusting Hey Attrangi with your mental health journey.
